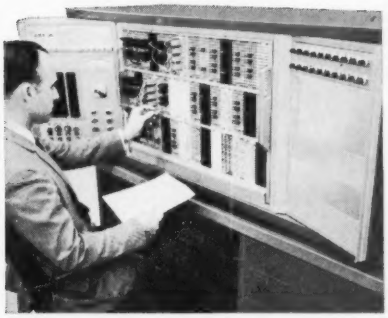
The big analog computer for small budgets



Where else can you find 100-amplifier capacity at a starting price of $20,000? Nowhere. That's the main reason over 100 labs now use Systron-Donner's SD 40/80 desk-top computer. Three other good reasons are:

1. Built-in digital logic to handle complex problems involving sub-routines, iterative solutions and automatic parameter changes.

2. Unique patchboard to simplify programming.

3. "Big computer" features like ±100-volts and state-of-the-art nonlinear equipment.

These features give you problem-solving ability approaching that of computation centers right in your own lab. Everything is designed to be used by the research worker—without extensive training or the help of a computer programmer.

Free sample of simplified softwear

"Block Programming for Physical Systems," Chapter 5 of our "Handbook of Analog Computation," will be sent to all who inquire. A reply card to request entire 150-page handbook will be enclosed.

ANNUAL INDEX

Journal of Engineering Education Volume 58, 1967-68

The page numbers in this Index refer to the regular issues of the *Journal of Engineering Education* for 1967-68:

1- 98	September	479- 782	February
99-180	October	783- 880	March
181-260	November	881- 992	April
261-358	December	993-1084	May
359-478	January	1085-1048	June

The *Annual Directory of Engineering College Research and Graduate Study, 1968* was published as Part II of the February issue. As the Directory contains its own index, there are no references to it in this Annual Index (see pages 559-782).

In this Index, **boldface type** indicates subject headings; *italics* indicate authors; and the titles of articles and departments appear in regular type. Page numbers are explained above.

Table Top Torsion Test, The, 234.
Tapp, June L., 1115.
teacher roles, 117
teaching aids, 232, 234.
teaching and research, 540.
Teaching Design Synthesis Techniques in the Classroom, 848.
teaching methods, 112, 139, 157, 159, 205, 848, 966, 1120.
technical education, 1063.
technicians, engineering, 924.
technology, 1063, 1097, 1099.
television, educational, 149.
Terman, Frederick E., 1053.
testing, materials, 210.
tests, announced repetitive, 110.
T-Group Methods in Engineering Education, 159.
thesis, doctoral, 801.
Throne, J. L., 106.
Tiller, Frank M., 509.
time-sharing systems, 917.
Torpey, William G., 227, 1102.
torsion test, 234.
transportation, 456.
Trends in Engineering College Research, 1059.
Tulin, Leonard G., 210.
Tyson, Herbert, 274.

U
UCLA, 528.
Undergraduate Experience, An, 850.
Undergraduate Project Laboratory, An, 215.
unification of training programs, 542.
Using a Computer Program for Individual Problem Assignments, 966.

V
Van Name, F. W., Jr., 968.
vapor-liquid equilibria, 1110.
Vesilind, P. A., 151.
Vesper, Karl H., 546.
visual aids, 149.
Visual Thinking and the Design Process, 795.
VITA: Solving Technical Design Problems Throughout the World, 815.

W
Wallis, Graham B., 801.
Wandmacher, Cornelius, 143, 1056.
Western Electric Fund Awards, 40.
Why Student Engineering Magazines?, 145.
Williams, C. G., 234.
Williamson, Merritt A., 141.
Wu, J. H. T., 232.

Y
Yerazunis, Stephen, 835.
Yokel, Felix Y., 810.
Young Engineering Faculty View Their Profession, 1066.
Your Society's Business, 24, 490.
